Professional Summary

Computer Science undergraduate passionate about AI, workflow automation, and software development. Experienced in building AI-powered automated applications using platforms such as Zapier, n8n, and Make.com. Strong problem-solving skills with an interest in streamlining business processes through intelligent automation.

Education

Bachelor of Computer Science

Expected 2027

University of Wolverhampton

Relevant Coursework: Artificial Intelligence, Data Structures, Database Systems, Software Engineering, Full Stack Development

Technical Skills

Languages: C, Python, JavaScript, Java, C#, SQL, PHP

AI Tools: ChatGPT, Claude, OpenAI API, LangChain, Prompt Engineering

Automation: Zapier, n8n, Make.com, REST APIs

Web: HTML, CSS, JavaScript

Tools: Git, GitHub, VS Code, Antigravity, Excel, PowerPoint, Google Docs

Projects

AI - Powered Event Management System

- Built an AI powered event management system with integrated LLM based voice search functionality.
- Designed and developed proper responsive system following coding principles, modern tools and technologies.
- Reduced response time through AI-powered workflows.

Workflow Automation System

- Developed automated workflows using n8n connecting Gmail, Google Sheets and Slack.
- Eliminated repetitive administrative tasks through scheduled and event-driven automation.
- Integrated third-party APIs for notifications and reporting.

Student Record Management System

- Developed a full-stack web application for managing student records, academic data, and administrative operations.
- Implemented database integration, CRUD operations, and user management features using modern web technologies.
- Designed responsive interfaces and structured backend workflows to improve data organization and accessibility.

Experience

Software Development / AI - powered Content Research and Development Intern

Summer 2025

Void Nepal

- Assisted in the development of AI - powered content and courses.
- Improved application features and fixed software bugs.
- Collaborated with developers using Git and Agile workflows.

Certifications

- Google AI Essentials
- Python for Everybody
- Introduction to C#
- Introduction to Data Structures and Algorithm

Leadership & Activities

- Member, AI Club
- Hackathon Participant
- Open Source Contributor
- Team Lead (College Project)
